

Integration testing - Developer 1 - Voter Component

Adolfo Centeno

April 18, 2018

Table of contents

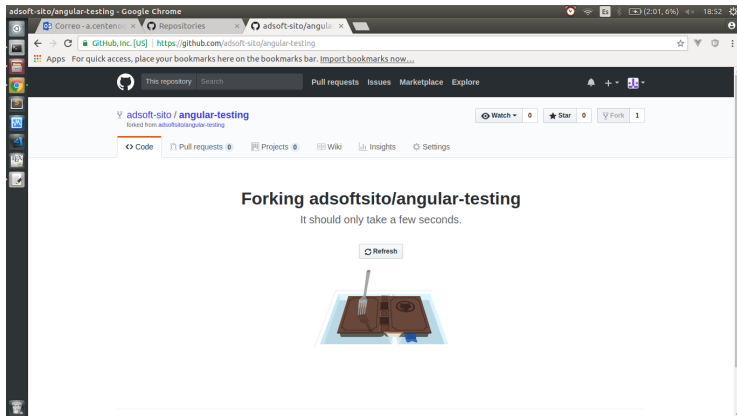

- 1 install Angular - Integration Testing

open new terminal, install Angular

```
sudo npm install -g @angular/cli
```

fork repo

`https://github.com/your-lider/
angular-integration-testing.git`
click in fork

clone your repo

```
mkdir dev-integration-testing  
cd dev-integration-testing  
git clone -b develop  
https://github.com/your-own-repo/angular-integration-testing.git  
cd angular-integration-testing  
npm install  
ng test
```

voter branch

```
git branch
```

```
git branch voter
```

```
git checkout voter
```

```
git merge develop voter
```

```
git branch
```

```
create voter component
```

```
ng generate component voter
```

```
cd src/app/voter
```
